SUMMARY

Strategy analyst supporting a 3-year Consumer Bank growth plan and AI/ML model-risk governance, with generative-AI (large language model) workflows adopted teamwide. B.S. in Financial Technology, 3.7 GPA; fluent in SQL and Python.

EDUCATION

Virginia Commonwealth University

Bachelor of Science in Financial Technology, Minor in Statistics

GPA: 3.7 / 4.0 | Dean's List (All Semesters)

Relevant Coursework: Python, Statistical Modeling (SAS, R, SQL), Econometrics, Business Intelligence & Data Mining (AI/ML)

Richmond, VA

May 2025

WORK EXPERIENCE

Bank of America

Strategy & Management Consultant, Consumer & Small Business

Charlotte, NC

July 2025 – Present

- **Consumer Strategy** — Prioritized growth opportunities and key risks in a 3-year strategic plan for a ~69MM-client Consumer Bank, diagnosing performance, market trends, and customer dynamics for senior leadership.
- **Consumer Strategy** — Shaped Investor Day messaging and long-range planning by distilling cross-functional inputs into executive-ready materials for senior leadership.
- **Complaints AI Integration** — Delivered ~8 regulatory responses and ~30 model-level submissions ~80% ahead of deadline for AI/ML complaint-handling models under active model-risk review, coordinating audit and exam evidence across three enterprise systems.
- **Complaints AI Integration** — Built an executive dashboard giving leadership real-time visibility into testing scope, progress, and control gaps across the program's 3 AI complaint workstreams; redesigned a complaints tracker to standardize ownership, status, and milestones.
- **Complaints AI Integration** — Cut ad-hoc slide turnaround from hours to ~15 minutes by designing a governed generative-AI (Microsoft Copilot) prompt framework that turns rough inputs into source-backed executive slides, adopted teamwide.

Capital One

Business Analyst, Retail Banking

McLean, VA

June 2024 – August 2024

- Diagnosed drivers of friction in external bank-account linking by analyzing complaint logs and call data across five-figure interaction volumes using SQL and Excel.
- Quantified impact on complaint frequency and downstream outcomes for the Retail Bank Fraud team by designing and evaluating multiple A/B tests across linking strategies.

Alliant Insurance Services

Benefits Analyst (Actuarial Sciences)

McLean, VA

June 2023 – December 2023

- Cut client premiums ~10% on average by analyzing healthcare claims experience for 7 employer clients with Excel-based actuarial and pricing models, informing benefit redesigns.
- Supported annual valuations and renewal decisions by evaluating pricing, census, and vendor-disruption scenarios with data-driven insights.

PROJECTS

Axira — Multi-Agent Outreach Automation | Python, LLM agent orchestration, self-hosted Linux github.com/DixitSA/axira-lite

- Built and self-hosted a multi-agent AI system that automates end-to-end outreach, orchestrating 3 specialized large language model (LLM) agents across research, drafting, and follow-up in one pipeline.
- Engineered a human-in-the-loop approval gate for oversight and ran the full system on ~\$0 infrastructure via a headless home server and free/low-cost tooling.

Kaal — Vedic Astrology Decision App | Next.js, TypeScript, Python, Capacitor (iOS)

getkaal.com

- Shipped a Vedic astrology decision-support app to production (web + iOS) with a full user interface, turning deterministic chart computation and daily state into clear, preset guidance.
- Architected a local-first computation engine with a full test suite across 17 modules (277 commits); paired with a niche community go-to-market and organic outreach for early user acquisition.

SKILLS & INTERESTS

AI & Analytics: Generative AI tools (ChatGPT, Microsoft Copilot, Claude), prompt engineering, LLM-assisted workflow automation, AI/ML model governance & risk, applied analytics.

Technical: SQL, Python, R, SAS; Tableau, Power BI; Microsoft Excel (advanced formulas, pivot tables, modeling).

Languages: Hindi, Gujarati.

Interests: Health & wellness, fitness, investing.
